

To whom it may concern,

Bromoco International has been making protective coatings since 2004 and in 2013 developed and brought to market TOUCH Antimicrobial.

Over the past 17 years Bromoco Internationals coatings have consistently outperformed their expected longevity with coatings initially guaranteed for 3-5 years, lasting more than double their guarantee range. In 2010 Bromoco's coatings were applied at McLaren's Technology Centre in Woking UK. The coating is still in place today and still performing and protecting in the same manner as it was the day it was applied.

TOUCH Antimicrobial coating is an evolution of Bromoco's product range and is a mixture based on an acrylic copolymer dispersion. It is applied as a liquid and dries as a solid, hard coating. Once dried the coating remains in situ and does not leach or return to a liquid form. The silver ions in the coating will remain active for the lifetime of the product and maintain its antimicrobial properties.

When applied through a qualified and approved application team, Bromoco guarantee the coating will last for 5 years. We also suggest that high contact areas, such as door handles, are checked after 18 months as they will give the best reading as to how all other coated surfaces are performing. We provide a maintenance package that include this check up and the re-application of the coating where needed.

Much like with our past coatings, we have started with a 5-year guarantee, however we expect we may be able to extend this to 10 years as more case studies are completed and more data comes back to support the coatings performance. In the meantime, I can share with you some testimonials from our clients and test partners over the past 17 years.

A Semple

*Tony Semple*

Technical Director

[www.touchantimicrobial.com](http://www.touchantimicrobial.com)

*"Bromoco were recommended to us by a client and I am glad they told us. We recently asked Bromoco to Coat our high touch points With Touch Anti-Microbial coating so we could have another layer of protection in our office communal areas. They did exactly what we asked them to do and finished on time and on budget. Our staff are now comfortable to come into the office knowing that all is being done to protect them from virus and bacteria. I would have no hesitation in using them again in the future."*

KWB Birmingham. Judith Williams BSc (Hons) MRICS

KWB Property Management wanted to put in place preventative measures on their site to raise the base level of protection for their employees. TOUCH Antimicrobial has done that for them and their staff are now more comfortable returning to the office.

*"Top class service from a top-class team. Bromoco came and coated our Parks Playgrounds recently with Touch Coating and we could not be happier with the results. Our aim is to open the playgrounds ensuring that Everything had a level of protection also looks so much more colourful and professional. Great work!"*

Glynn Gibson CFIOSH, FIIRSM, RSP, MEPS

Health & Safety Manager

**Basildon Council**  
BASILDON • BILLERICAY • WICKFORD

Basildon Council had Bromoco coat their children's playgrounds with TOUCH Antimicrobial. Their goal was to create a safer environment for those using the site and have added peace of mind for the parents.

## BROMOCO Products at McLaren F1 MTC Woking

*“We have been working with BROMOCO products for over 12 years. We originally contacted BROMOCO in 2008 to address an issue we had with our stainless steel in our swimming pool. BROMOCO coatings were applied internally to several areas of our building.*

*In 2010 when building commenced on our McLaren Production Centre (MPC) where the McLaren road cars are manufactured the original building McLaren Technology Centre (MTC) was looking tired. Impressed with the performance of the BROMOCO coatings Ron Dennis then CEO requested that the entire external all elements of our prestigious MTC building.*

*The BROMOCO coatings have now been on our buildings both internally and externally for well over a decade and are still performing as well today as when they were first applied as far back as 2008.*

*As you can imagine as a Formula One team, we have extremely high standards of product and performance and are happy to confirm that BROMOCO coatings have far exceeded the original guarantee 3 times.*

*In conclusion in our experience the BROMOCO coatings range has provided high levels of finish, protection, and outstanding durability. Now with everyone’s focus on the viral threat BROMOCO coatings is our first choice and we plan to have our new building MPC treated in the near future.”*

Keith Reed – Former Facilities Manager, McLaren Technology Centre - home of Formula One
